# TRANSPARENT RANKING: Institutional DATA Repositories by Google Scholar (December 2024)

TRANSPARENT RANKING: Institutional DATA Repositories by Google Scholar

18<sup>th</sup> Edition (December 2024)

During the last months, we realized the indexing of records of several open access repositories by **Google Scholar** is not as complete as previously without a clear reason. From the experience of a few cases, it looks that GS penalizes error in the metadata descriptions, so it is important to the affected repositories to check their level of indexing and to try to identify potential problems.

Please, consider the following Indexing GS guidelines  
<https://scholar.google.com/intl/en/scholar/inclusion.html>  
<https://www.or2015.net/wp-content/uploads/2015/06/or-2015-anurag-google-scholar.pdf>

and the following material: [Exposing Repository Content to Google Scholar](#)

A few suggestions for improving the web visibility of the contents of your institutional OA repository  
["Altmetrics of the Open Access Institutional Repositories: A Webometrics Approach"](#)

As a service for the OA community we are providing four lists of repositories (all (institutional+subject), institutional, portals and CRIS) with the raw numbers of records in GS for their web domains (site:xxx.yyy.zz excluding citations and patents) ranked by decreasing number of items as collected during the third week of **DECEMBER 2024**. The list is still incomplete as we are still adding new repositories.

As usual, you can contact our [editor \(Isidro F. Aquillo\)](#) for any comment or suggestion.
